Skills

- Docs-as-Code
- Documentation strategy
- Information architecture
- Developer portals
- Documentation analytics
- Onboarding journeys
- API documentation
- SDK documentation
- Markdown
- AsciiDoc
- MDX
- Docusaurus
- Hugo
- Antora
- Mintlify
- Scalar
- Git
- GitHub
- GitLab
- OpenAPI
- Swagger
- JSON
- YAML
- CLI testing
- VS Code
- Cursor
- Copilot
- Custom GPTs
- MCP servers

Certifications

Agentic AI for Developers: Concepts and Application for Enterprises
LinkedIn Learning Community,
Issued Jun 2025
[View certificate](#)

Using Generative AI in Technical Writing
Cherryleaf, Issued Apr 2025
[View certificate](#)

People Manager Program 2024
Lepaya, Issued May 2024
Credential available

Education

BSc (Hons) Technology Management
University of Wales
Part completed; achieved a 2:1 in first year

10 GCSE passes, 2 A-Level passes
Marling Grammar School
English and Art

About me

I'm a technical writer and information engineer with a focus on developer documentation in fintech and SaaS. I specialise in API documentation and developer portals, and I spend most of my time working closely with engineering teams to make complex products easier to understand, onboard, and adopt.

I build and maintain docs-as-code pipelines, design information architectures, and shape documentation strategy across distributed teams. I care about the full picture, from the first onboarding step a developer takes to the enterprise stakeholder who needs to sign off on it. I've worked across Open Banking, payment processing, authentication platforms, and cloud-native environments, which has given me a good eye for what developers actually need versus what they're handed.

I think a lot about where documentation fits in the developer experience, and how modern tooling (custom GPTs, MCP servers, analytics pipelines) changes what's possible for a writing team. My view: good docs aren't just content, they're a product. They should be designed, measured, and iterated on like one.

Work experience

Senior Technical Writer | Dec 2025 - Present

Backbase, remote

- Author technical documentation for solution engineers and developers delivering complex banking implementations
- Standardise documentation workflows to improve consistency across distributed teams
- Maintain an AI-first workflow to extract implementation details from source code and accelerate delivery without lowering quality

Documentation Manager | Jul 2023 - Nov 2025

Backbase, remote

- Led a distributed team of technical writers, improving collaboration, productivity, and team growth
- Wrote developer guides with engineering and solution teams for complex banking software
- Developed AI-assisted authoring workflows while maintaining rigorous quality standards and repeatable review practices

Senior Technical Writer | Nov 2021 - Jul 2023

Backbase, remote

- Created comprehensive technical and integration documentation for global banking software
- Implemented the Google Developer Documentation Style Guide across EMEA teams
- Improved peer review processes and content strategy to enable faster, more reliable release cycles

Technical Account Manager | May 2021 - Oct 2021

Viva Wallet, remote

- Acted as the primary technical liaison for enterprise clients during high-stakes system incidents
- Produced payment API guides and technical enablement content to support developer adoption
- Built a fully automated docs-as-code pipeline using GitHub and Markdown

Technical Writer | Jan 2019 - Apr 2021

Viva Wallet, remote

- Launched the company's first scalable developer documentation platform by creating a developer portal from scratch with docs-as-code workflows
- Produced API, SDK, and plugin documentation for a payment integration platform to help developers move from initial setup to successful implementation faster
- Established documentation analytics and feedback loops to enable data-driven content optimisation

Digital Content Officer | Apr 2018 - Dec 2018

University of the Arts London (UAL), London

- Led large-scale content migration during a CMS transition affecting 20,000+ students
- Redesigned online forms and workflows to better support a diverse student population
- Coordinated IT and academic stakeholders to deliver a seamless digital transition

Technical Writer | Sep 2017 - Feb 2018

ipagoo, London

- Produced Open Banking API documentation during a critical regulatory transition
- Launched the company's first developer portal in a high-growth fintech startup environment

Technical Writer (Contract) | Jun 2016 - May 2017

MIRACL, London

- Authored documentation for complex cryptographic SDKs and multi-factor authentication platforms
- Conducted technical reviews and platform testing on AWS infrastructure for worldwide deployment

Technical Writer (Contract) | Mar 2016 - May 2016

Mumsnet, London (on-site)

- Created comprehensive onboarding documentation for distributed Java, iOS, and Android teams
- Designed infrastructure diagrams and process flows supporting remote engineering operations
- Established knowledge-sharing protocols that improved developer onboarding efficiency

Web Manager | Aug 2012 - Mar 2016

Chartered Institute of Public Relations (CIPR), London

- Managed content strategy for the corporate website serving PR professionals across multiple regions
- Led digital campaigns, including national awards, by coordinating remote cross-departmental teams

Web Editor (Contract) | Jan 2010 - Aug 2012

Chartered Institute of Public Relations (CIPR), London

- Delivered a comprehensive site migration and improved legacy content quality
- Maintained content quality and consistency across a multi-year digital transformation initiative
